Jalan Bunga Sedap 10 No. 36 C. Cheerfulness of Harmony. District Medan Selayang, North Sumatra, Indonesia

I am a third-year Diploma III (D3) Computer Technology student at Del Institute of Technology with a strong interest in software development, cybersecurity, data science, and technology-driven problem-solving. I have developed a solid foundation in web and mobile application development, system design, and database management through academic projects and hands-on experience. I am passionate about creating innovative, secure, and user-centered digital solutions that address real-world challenges. As an adaptable and motivated learner, I continuously seek opportunities to expand my technical expertise, collaborate with diverse teams, and contribute to meaningful projects that deliver practical and impactful technological solutions.

Work Experiences

TOBA BATAK CULINARY WEBSITE - **Depan Gerbang Institut Teknologi Del, Sitoluama, Kecamatan Balige, Kabupaten Toba, North Sumatra 22381, Indonesia** Jan 2025 - Jun 2025

Web Developer

- Developed a culinary directory platform providing comprehensive information on traditional dishes and food spots across the Toba region.
- Built an interactive information catalog to categorize authentic Toba Batak cuisine, restaurant profiles, and pricing details.
- Implemented search and location filtering features to help tourists and users easily discover local culinary spots.
- Designed a responsive interface to ensure a seamless browsing experience across all mobile and desktop devices.
- Managed and optimized the Content Management System (CMS) to streamline regular updates on culinary data and spot recommendations

Platform Cybersecurity Readiness Index (CRI) Berbasis Website Untuk Pelajar SMA/SMK - **Depan Gerbang Institut Teknologi Del, Sitoluama, Kecamatan Balige, Kabupaten Toba, North Sumatra 22381, Indonesia** Jan 2026 – Jun 2026

Full Stack Developer (Next.js, Python)

The Cybersecurity Readiness Index (CRI) Platform is a digital educational initiative designed to measure, evaluate, and enhance cybersecurity literacy and awareness among high school (SMA/SMK) students through interactive testing simulations.

- Developed a web-based Cybersecurity Readiness Index (CRI) platform using Next.js (Frontend) and Python (Backend) designed to evaluate the cybersecurity awareness of high school students.
- Designed an interactive and responsive assessment interface using Next.js to dynamically present cybersecurity questionnaires and scenarios.
- Built the backend scoring engine using Python to process student responses, calculate readiness metrics, and generate instant evaluation reports.
- Managed database architecture to securely store student profiles, assessment histories, and test scores for analyzing student cybersecurity literacy

AEGIS-X: Security Operation Center (SOC) Platform - **Depan Gerbang Institut Teknologi Del, Sitoluama, Kecamatan Balige, Kabupaten Toba, North Sumatra 22381, Indonesia** Feb 2026 – Jun 2026

Cybersecurity Developer

AEGIS-X is an end-to-end Security Operations Center (SOC) platform designed for comprehensive threat investigation and incident response. The platform monitors system telemetry in real-time, correlates security events, and leverages Artificial Intelligence (AI) to assist analysts in identifying and mitigating cyber attacks.

- Developed an end-to-end Security Operations Center (SOC) platform using Next.js, Python FastAPI, and Go, integrated with Wazuh SIEM/XDR for real-time threat detection across multiple endpoints.
- Integrated a Large Language Model (LLM) to build an AI Security Analyst module capable of analyzing log findings, explaining attack vectors, and recommending evidence-based mitigations.
- Implemented Sigma Rules for detection engineering and mapped security alerts to the MITRE ATT&CK framework to standardize threat investigation analysis.
- Built a SOC investigation dashboard and an Interactive Attack Graph using React Flow to visualize correlations between IPs, devices, and suspicious activity sequences.
- Designed Automated Incident Response workflows via playbook execution (e.g., automated IP blocking) and managed the analytical data infrastructure using PostgreSQL, OpenSearch, and Docker.

Pengembangan Sistem Cybersecurity Readiness Index (CRI)
Dan Penambahan Domain Berbasis AI - **Depan Gerbang Institut Teknologi Del, Sitoluama, Kecamatan Balige, Kabupaten Toba, North Sumatra 22381** Juli 2026 – Feb 2027

This project is the advanced development phase of the Cybersecurity Readiness Index (CRI) platform, focusing on system architecture upgrades and Artificial Intelligence (AI) integration to automate the creation and categorization of evaluation materials..

Full Stack Developer

- Developed a web-based Cybersecurity Readiness Index (CRI) system using Laravel and MariaDB/MySQL to manage evaluation data efficiently
- Implemented authentication and dynamic role-based access control features for 3 specific user roles (Admin, Teacher, Student) within the system
- Integrated the LLaMA Large Language Model (LLM) to automatically generate diverse cybersecurity evaluation questions
- Built an AI-driven recommendation pipeline to analyze, map, and classify questions into appropriate readiness indicators and domains
- Connected frontend interfaces with AI backend modules to ensure reliable system functionality and seamless user workflows

Education Level

Institut Teknologi Del - **Laguboti, North Sumatra** Sep 2024 - Sep 2026 (Expected)

Diploma in Computer Technology, 3.16/4.00

Organisational Experience

HIMATEK IT Del - **Laguboti, Indonesia** Oct 2024 - Oct 2025

Member of the Division

HIMATEK (Computer Technology Student Association) of IT Del is a student organization focused on developing the academic, professional, and communal aspects of Computer Technology students.

Depol IT Del - **Laguboti, Indonesia** Feb 2026 - Present

Member of the Departemen

Depol (Sport Departemen) of IT Del is a department within the Student Affairs Organization that serves as a platform for building friendship and unity among students through sports and physical activities. The department promotes sportsmanship, teamwork, and solidarity while encouraging an active, healthy, and supportive campus environment.

Student Mentor (Abang/Kakak Asuh) IT Del Student Leadership Program - **Laguboti, Indonesia** Agustus 2025 - Juni 2026

Member of the Student Mentor Committee

Selected as a student leader to mentor and guide first-year students during their transition into university academics and dormitory life. Actively collaborated with dormitory supervisors to maintain campus discipline, safety, and a positive living-learning environment while serving as a supportive role model by demonstrating exemplary conduct and high standards.

Skills and Certificates

- **Programming Languages:** Python, Go, PHP, JavaScript, TypeScript, C, Dart
- **Web Frameworks & Libraries:** Next.js, Laravel, Python FastAPI, React (React Flow), Tailwind CSS, WordPress
- **Databases:** PostgreSQL, MySQL / MariaDB, OpenSearch, MongoDB, Firebase
- **Cybersecurity & AI:** Wazuh SIEM/XDR, Sigma Rules, MITRE ATT&CK, LLaMA (LLM Integration), Machine Learning, Data Analysis (Pandas, NumPy)
- **Tools & Infrastructure:** Docker, Git, GitHub, Postman, Figma, Android Studio, Linux
- **Concepts & Architecture:** System Design, Object-Oriented Programming (OOP), RESTful API, Role-Based Access Control (RBAC), Detection Engineering, Agile Development
